

El mundo funciona con Microsoft Windows en gran medida gracias a la diversidad de aplicaciones de terceros disponibles. Los artefactos que dejan estas aplicaciones son tan diversos como las propias aplicaciones, abarcando todo el sistema de archivos. Aquí encontrará algunos de los artefactos más importantes disponibles de las aplicaciones populares de Windows, incluidos los navegadores, las aplicaciones de productividad y comunicación, y el almacenamiento en la nube. Tenga en cuenta que las aplicaciones cambian con el tiempo y que las aplicaciones más antiguas o más nuevas inevitablemente almacenarán los datos en diferentes ubicaciones. Si bien una visión completa es poco práctica, estas ubicaciones son excelentes lugares para comenzar una investigación.
